T2

EN 15619

REACTION TO FIRE

Class T2 to EN 15619 (tested to EN 14115) — AITEX report no. 2025AN1158

- Classification certificate issued by AITEX on 25 April 2025 (EN 15619:2014; test EN 14115:2001).
- EN 15619 classifies coated fabrics for tents from T1 (most demanding) to T4. It is not a Euroclass under EN 13501-1 and has no Euroclass equivalent.
- The class applies to the tested fabric (composition, weight and colour). A copy of the certificate is supplied with the material, and before ordering on request.

SUPPLY

Formats, widths and lengths: please ask us.

ORDERS AND SAMPLES

- Free, no-obligation quote: tell us the fabric, colour, width and metres, or your tent dimensions.
www.plastold.com/en/contacto
- Free sample book for professionals, dispatched within 48–72 working hours.
www.plastold.com/en/muestrario-lonas-pvc
- Shipping across Spain and Europe.

The values in the table are typical production values: they may vary within normal manufacturing tolerances and do not constitute a contractual specification. The fire classification is the one stated in the AITEX report cited above. Check the requirements that apply to your installation with your technician.
